APPLYING FOR AN ARGOS PROGRAM

If you are new to Wildlife Computers or need to create a new Argos program, this document will provide you with the information you need to create your program.

If you wish to operate a location and data collection program using the Argos satellite system, your program will need be approved and unique identification numbers (PTT IDs) assigned to each tag. You must use the online application system—argos-system.org/become-a-user—to describe your program and apply for PTT IDs.

Click on the “Register” button.

You will need to provide the contact information for the program’s administrator. Fill out the form completely, click on the reCAPTCHA, and then “Next.”

ARGOS

Applying for an Argos Program – continued

The next form provides the specifics of your Argos program. You need to complete the following information:

- Program name—provide a name for your project (e.g., Gulf Sea Turtle Project).
- Deployment date—select one month before your tags are scheduled to ship from Wildlife Computers.
- Type of Argos application—enter “Wildlife.”
- Duration (in months)—enter the longest duration possible for your application. This will become your program’s expiration date.
- Planned number of platforms—enter the number of PTT IDs you need for your program. You need one PTT ID per tag.
- User requirements—***this field is for CLS information purposes only. It has no bearing on what data or services you will receive.*** You can select as many as you want. Wildlife Computers recommends checking the following boxes:
 - Global coverage
 - Location accuracy
 - Low transmitter power (< one watt)
- Detailed description of the program objectives.

The screenshot shows the 'New program registration' form for ARGOS. The form is divided into several sections:

- Program**: Includes fields for Name (e.g., 'Your Project Name (e.g., Gulf Sea Turtle Project)'), Deployment date (e.g., 'Select one month before your tags are scheduled to ship from Wildlife Computers.'), Type of Argos application (e.g., 'Scroll down to "Wildlife."'), Duration (in months) (e.g., 'Enter the longest duration possible for your application. This will become the program's expiration date.'), and Planned number of platforms (e.g., 'Enter the number of PTT IDs. One PTT ID per tag you will deploy.').
- User requirements**: A grid of checkboxes for various requirements. The first column includes 'Polar coverage', 'Data throughput time', 'Service continuity and reliability', and 'Other, please specify:'. The second column includes 'Global coverage', 'Low transmitter power (< 1 watt)', and 'Platform compatibility'. The third column includes 'Location accuracy', 'Transmitter small size and light weight', and 'System access'. The fourth column includes 'Test and evaluation (manufacturer only)', 'Cost effectiveness (government users only)', and 'Dual GPS/Argos location'. A red box highlights the second, third, and fourth columns with the text: 'This section is for CLS information only and does not affect your program. We recommend checking Global Coverage, Low Transmitter Power, and Location Accuracy.'
- Detailed description of program objectives:** A large text area for providing a detailed description of the program's objectives.

Applying for an Argos Program – continued

The next form asks for additional information on the program, its purpose, and the organization.

The screenshot shows the 'New program registration' form for ARGOS. The form includes the following sections:

- ARGOS** logo and 'POWERED BY CLS' text.
- New program registration** header.
- Question: 'The purpose for which this program will be operated is:'. Options: ☒ Environmental, ☐ Non-environmental.
- Question: 'The organization operating this program is a:'. Options: ☒ Government user, ☐ Non-profit user, ☐ Non-government user. A red box highlights the text: 'Choose what is most applicable to your organization.'
- Question: 'If the user is a government agency's contractor or grantee, please give agency name and contract or grant number:'. A text input field is provided.
- Question: 'If applying for episodic use, is there a significant possibility for the loss of life?'. Options: ☐ Yes, ☒ No.
- Question: 'How did you hear about the Argos System?'. Options: ☐ Colleagues, ☒ Platform manufacturer, ☐ Conference, ☐ Scientific publication, ☐ Website, ☐ Social networks, ☐ Other. A yellow box highlights 'Platform manufacturer' with the text 'For example: Wildlife Computers'.

This final step in applying for an Argos program sets you up to start the PTT ID application process. Choose "Yes" to move forward or "No" to wait and apply for the PTT IDs later.

Wildlife Computers recommends selecting "Yes" to fill out the technical (PTT ID) file now to expedite the process of CLS approving your program and PTT IDs at the same time.

The screenshot shows the final step of the 'New program registration' form for ARGOS. It includes the following sections:

- ARGOS** logo and 'POWERED BY CLS' text.
- New program registration** header.
- Text: 'CLS is the only organization authorized to allocate Argos ID numbers. Each platform is identified by a specific ID number used for accurate system processing. These ID number(s) will be requested and integrated by your platform manufacturer.'
- Options: ☒ YES : Continue with Argos registration and fill out the technical file now, ☐ NO : Send Argos registration request (SUA), but fill out the technical file later.

Note: if your application is urgent, or if you have not received confirmation of your application after several days, we recommend contacting CLS to confirm that your information was received.

Applying for an Argos Program – continued

Additional Services

The Argos purchase order will include additional service options. The free Wildlife Computers Data Portal can be configured to automatically download Argos data and alert users when tags transmit, therefore ArgosDirect and ArgosMonitor services are not normally required by Wildlife Computers Portal users.

ArgosDirect

ArgosDirect is a fee-based service whereby CLS Argos will automatically deliver data to you. Options include tag data being distributed via email, SMS, FTP, or monthly CD-ROM. These data must still be imported into the Portal for decoding.

ArgosMonitor

ArgosMonitor is a fee-based service that will automatically contact Argos users when tags behave in a predetermined way. This could be when a tag enters or leaves a certain geographic area or has started or stopped transmission for a period. Generally, ArgosMonitor is not used by Wildlife Computers clients due to automatic downloading and alerts via the Wildlife Computers Portal.

ArgosMonitor and ArgosDirect are not required. These services are provided free of charge through the Wildlife Computers Data Portal.

APPLYING FOR NEW ARGOS (PTT) ID NUMBERS

Applying for New Argos ID Numbers

If you are coming from the program application process, begin with Step 5. If you are coming back to your application after logging out, begin with Step 1. CLS offers a generic video to help you along: <https://youtu.be/7XGXPEoQjbE>

Note: The ID application process is available online. If your deployment requires a different repetition rate, you can contact Wildlife Computers for an ID application form that includes a recommended Argos repetition rate.

1. Begin the application processing by logging into your Argos account using the username and password supplied by Argos. <https://argos-system.clsamerica.com/argos-cwi2/login.html>
2. When logged in, click on "My Account." This is the icon next to your username in the top-right corner.
3. Choose "SUA & Id request."
4. Choose "ID number request."

Applying for New Argos (PTT) ID Numbers – continued

5. Choose the program you want to associate with your PTT ID request, the total number of PTT IDs you need for the program (1 PTT ID per tag that will be deployed), and the starting date of your deployment program. Then click the + sign in the lower-right corner.

The screenshot shows the 'Id Request' form in the ARGOS system. The form has a blue header with the ARGOS logo and navigation links: Home, Data, System, and Support and help. Below the header is a green bar labeled 'Id Request'. The form contains three input fields: 'Program:' with a dropdown menu showing 'Choose your Argos program', 'Total number of ID(s) required:' with a text input 'Number of tags you are deploying' and a numeric spinner, and 'Starting date of deployment:' with a text input 'Deployment start date' and a calendar icon. Below these fields is a green bar labeled 'All id requests' and a table with three columns: 'Number of platforms', 'Platform type', and 'Platform model'.

Note: If you are coming directly from creating your Argos program, this is the screen you will see.

The screenshot shows the 'New program registration' form in the ARGOS system. The form has a blue header with the ARGOS logo. Below the header is a green bar labeled 'New program registration'. The form contains two input fields: 'Total number of ID(s) required:' with a text input 'Number of tags you are deploying' and a numeric spinner, and 'Starting date of deployment:' with a text input 'Deployment start date' and a calendar icon. Below these fields is a green bar labeled 'All id requests' and a table with three columns: 'Number of platforms', 'Platform type', and 'Platform model'.

6. On the next screen, you will need to fill out the number of tags you will be deploying, the platform family (fish, marine animals, birds, etc.), this is more specific about your species, platform manufacturer, and the tag type.

The screenshot shows the 'Form ID Number Request' form. The form has a blue header with the title 'Form ID Number Request' and a close button. Below the header is a green bar labeled 'Platform'. The form contains several input fields: 'Number of platforms:' with a text input 'Number of tags' and a numeric spinner, 'Platform manufacturer:' with a dropdown menu showing 'WILDLIFE COMPUTERS', 'Platform family:' with a dropdown menu showing 'Use dropdown to choose what fits your application', 'Platform model:' with a dropdown menu showing 'Use dropdown to choose your specific tag model', 'Platform type:' with a dropdown menu showing 'Use dropdown to choose your specific species', 'Platform ID type:' with two radio buttons: '28 bits' (selected) and 'Kinéis 32 bits', and 'Other platform type:' with a text input field.

Applying for New Argos (PTT) ID Numbers – continued

7. You need to fill out what kind of services you are requesting.
- You will choose “location and data collection.”
 - The location algorithm is as follows:
 - For SPOT, SPLASH, and Avian—“Kalman filtering”
 - For Pop-up or PAT tags—“Least Squares Analysis”
 - Typical repetition rates are as follows:
 - Sea Turtles—15 seconds
 - Sharks—15 seconds
 - Pop-up or PAT tags—60 seconds

Note: The requested repetition rate cannot be set to less than 40 seconds in the system. For a lower value repetition rate, you must enter 40 seconds and then in the “Explanation” field, you will write, “A fast 15- [or 30-] second repetition rate is required as this species spends little time at the surface.”

You can see the example in the photo below. Contact your Wildlife Computers representative if you aren’t sure about your repetition rate or require further assistance.

- Select “Yes” to send the ID numbers to the tag manufacturer.
- Select “No” to allow the manufacturer access to the data for one month.
- Click “Finish.”

Form ID Number Request

Services

☒ Location and data collection

☐ Data collection only

Location Algorithm:

Kalman filtering

*For Pop-up or PAT tags only: "Least Squares Analysis"

The standard repetition rate allocated for platforms that are to be located is 90 seconds and 200 seconds for those with data collection only. If you require a different repetition rate, could you please specify the rate you wish to be applied with a brief explanation. Requests for exemptions will be submitted for approval.

Standard repetition rate:

90

Requested repetition rate:

40

–

+

Explanation:

Refer to the repetition rate on the PTT ID request form or consult your Technical Sales Consultant. An example explanation might be: "We need a 15 second repetition rate (not 40 seconds). A fast repetition rate is required for species that surface infrequently."

Your chosen manufacturer will need information regarding these ID numbers so that they may integrate it into your platforms. Would you like us to send a copy of your Program overview to your manufacturer?

☒ Yes

☐ No

I authorize CLS to allow the manufacturer on-copy access to these platform ID numbers for one month, for testing purposes.

☐ Yes

☒ No
