

PRE-DEPLOYMENT: PORTAL CHECKLIST

Before you deploy your tags, there are a few important steps we recommend you complete within the Wildlife Computers Data Portal (Portal).

Previous Steps—See the [Pre-Deployment: Tag Checklist](#).

Next Steps—See the [Post-Deployment: Portal Checklist](#).

BEFORE the Tags Are Deployed

Sign in to the Portal: <https://my.wildlifecomputers.com>.

Link Your Argos Account(s) credentials to the Portal

- Learn more in the Portal & Tag Agent User Guide: <http://bit.ly/createportalaccount>.

Data Sharing—Establish Collaboration and Set Up Rules

- Researchers are responsible for establishing data collaboration with others.
- This is optional. Learn more in the Portal & Tag Agent User Guide: <http://bit.ly/WCDataSharing>.

Data Alerts—Set Up Batch or Specific ID Alerts

- This is optional. Learn more in the Portal & Tag Agent User Guide: <http://bit.ly/WCDataAlerts>.

The Wildlife Computers Data Portal (Portal), a collection of data management tools and services. Developed specifically for the display and investigation of data from Wildlife Computers tags, the Portal streamlines the processes of acquiring, preserving, and sharing data services. The Portal helps collect, prepare, and analyze the data returned from the tag—via Argos or the archive.

Data are easily sorted, filtered, searched, uploaded, and shared. You can see a Google Earth display of your deployment track, color-coded to show the relative age of each location. You can also set up a live KMZ to get data into your own monitoring system.
