1. The estimated tag life relies on battery variability, temperature, power settings, features utilized, etc. Life estimates are calculated using manufacturers' specifications and assumes 250 transmissions per day and, where applicable, 24 Fastloc® acquisitions per day.
2. The estimated lifespan is based on consumption of entire battery capacity pre-release. Contact Wildlife Computers to discuss optimizing settings and battery life for your particular project.

**This suite of towed tags is designed for deployment on whale sharks, basking sharks, mantas, and turtles. All feature robust nitinol antennas. Tags are provided with tethers and anchors attached unless otherwise requested.**
